

Physische/IT - Sicherheit

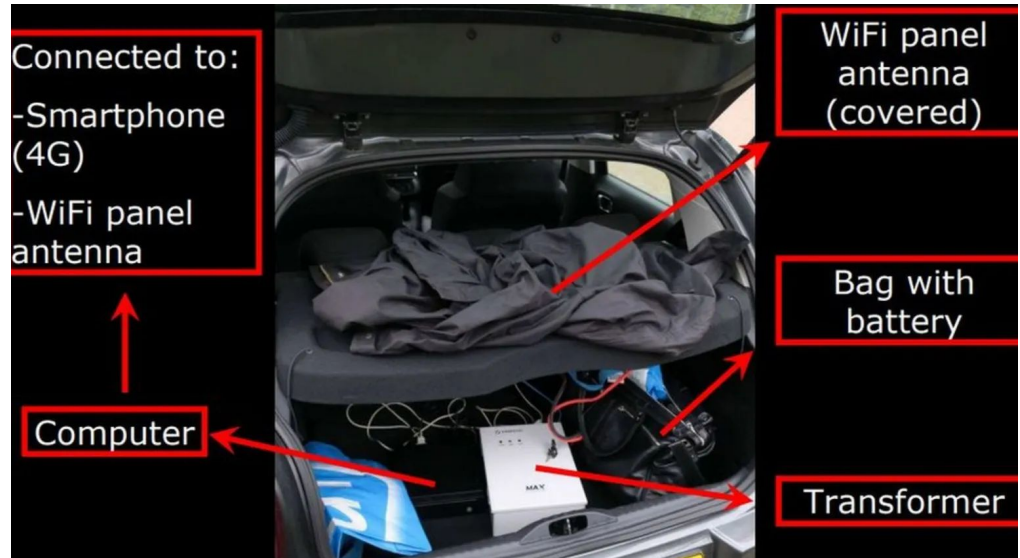

Von Schlössern zu Schlössern

Physische Sicherheit == / >= / ∈ IT-Sicherheit

Warum physische Sicherheit?

- IT-Sicherheit ohne physische Sicherheit: 😞
 - Cyberangriffe “vor Ort”
 - Keylogger, Injector, Screen Grabber, Network Sniffer, Remote Access,...
 - → Physical Pentesting

Warum physische Sicherheit?

- Physische Sicherheit ohne IT-Sicherheit? 😞
 - Überwachungskameras, Sensoren?
 - Alarmierung?
 - Key Cards, Knobs

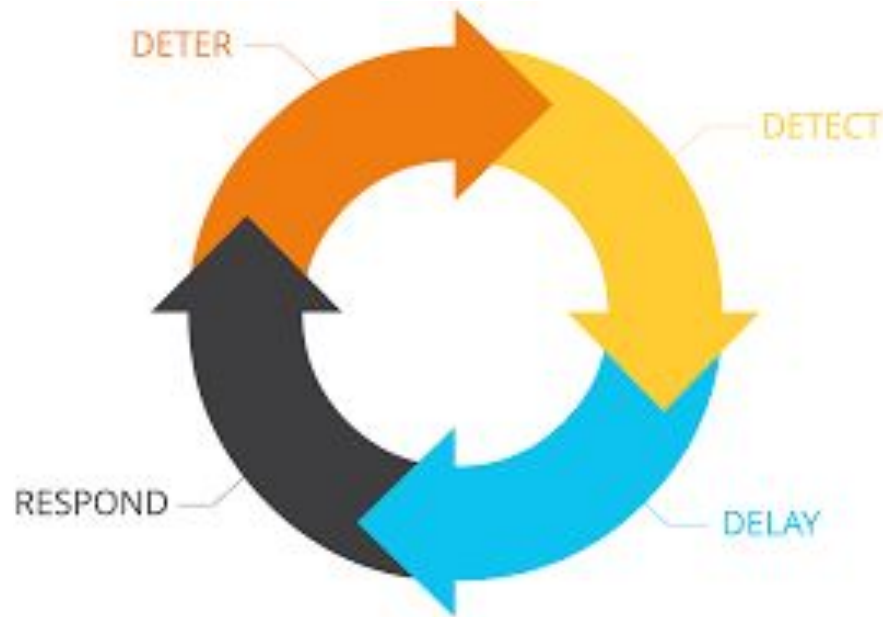

LOCKED OUT

Facebook Employees Have Reportedly Been Locked Out of Company Offices

They're not even getting work emails right now.

By [Victor Tangermann](#) / Updated Oct 4, 2021 5:06 PM EDT

Ziele: 4D - Deter / Detect / Delay / Defend

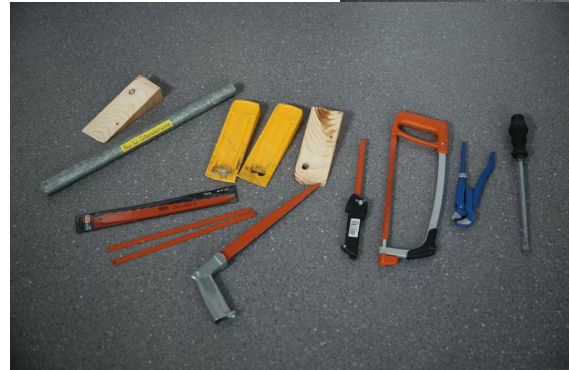

Abschreckung (Deter) als Sicherheit

Deter: Beispiel Schutzklassen von Türen

Widerstandsklasse RC3:

- leichte Werkzeuge:
Schraubenzieher, Zangen, Keile
- Brecheisen
- mehr als 5 Minuten

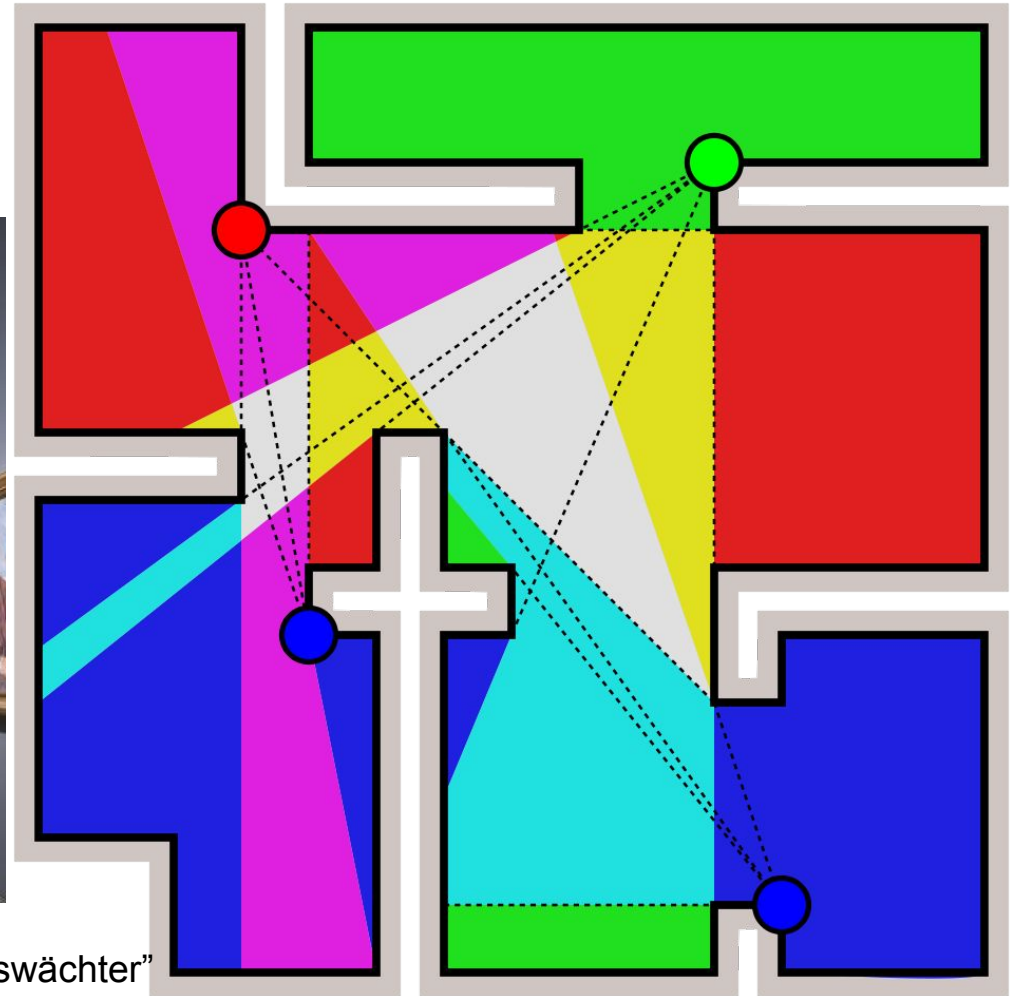

Deter

Ziel: Abschreckung, Wahl eines leichteren Opfers

Beispiele: Sicherheitstüren, (Fake) Alarmanlagen, Sicherheitskontrollen

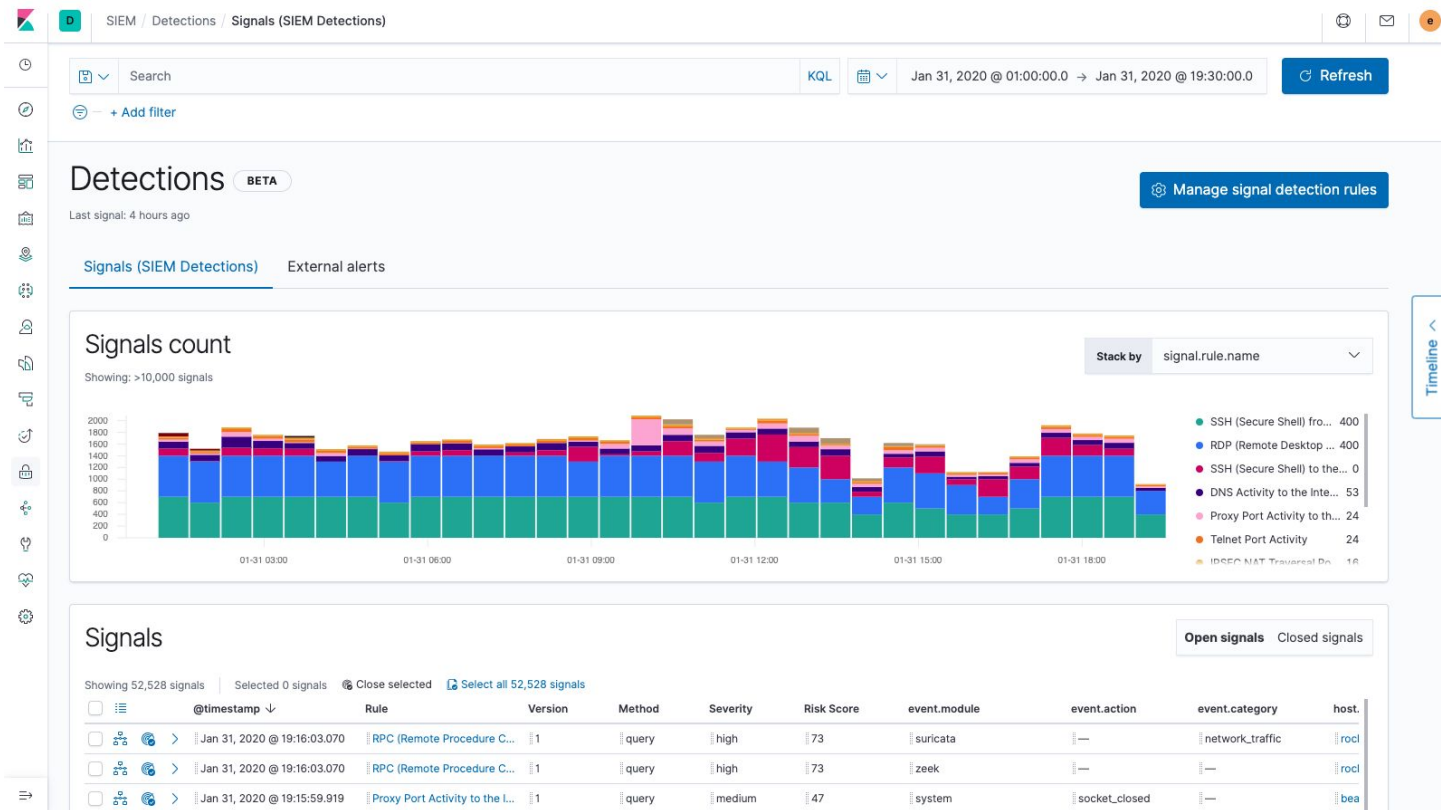

→ IT-Sicherheit: Angriffsfläche verringern, Updates einspielen, Passwortsicherheit, Prävention Innentäter

Detect - Kameras

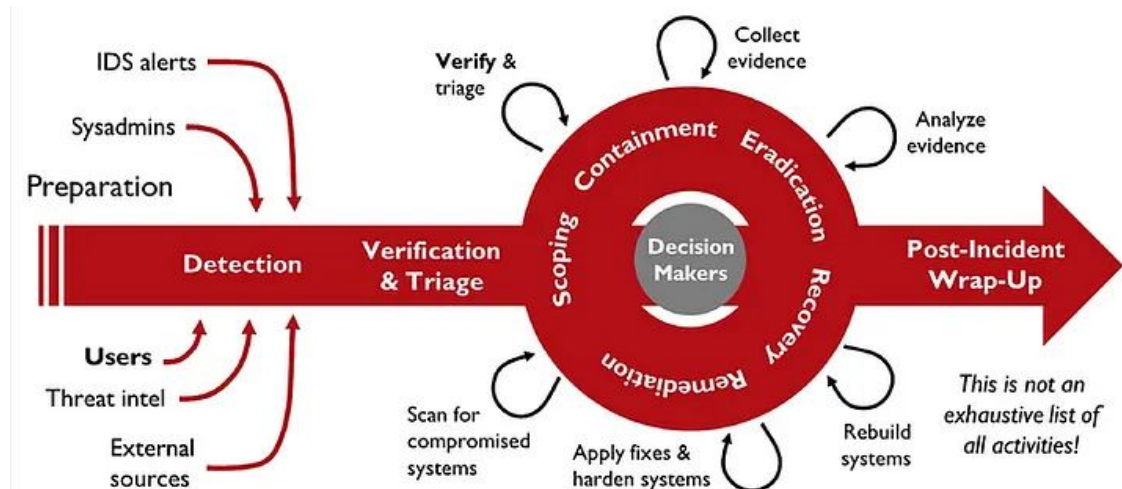

Art-Gallery-Problem / “Problem der Museumswächter”

Detect - SIEMS

Respond

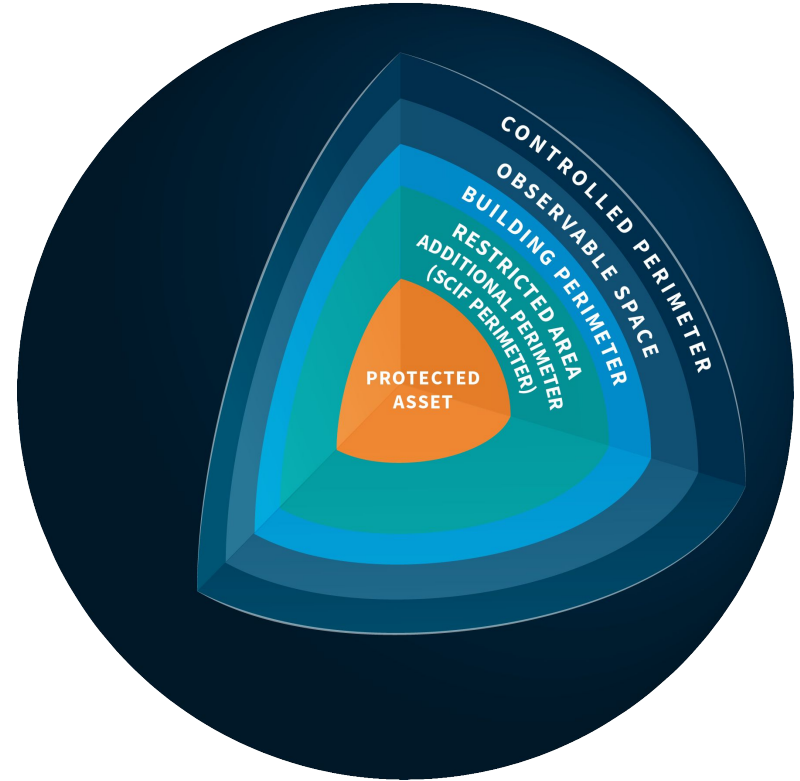

- Alarm: laut / still
- IT-Security:
 - SOCs (Security Operation Centers)
 - SOAR - Automatisierung
 - DFIR - Digital Forensics and Incident Response

Zwiebelschalenmodell / Defence in Depth

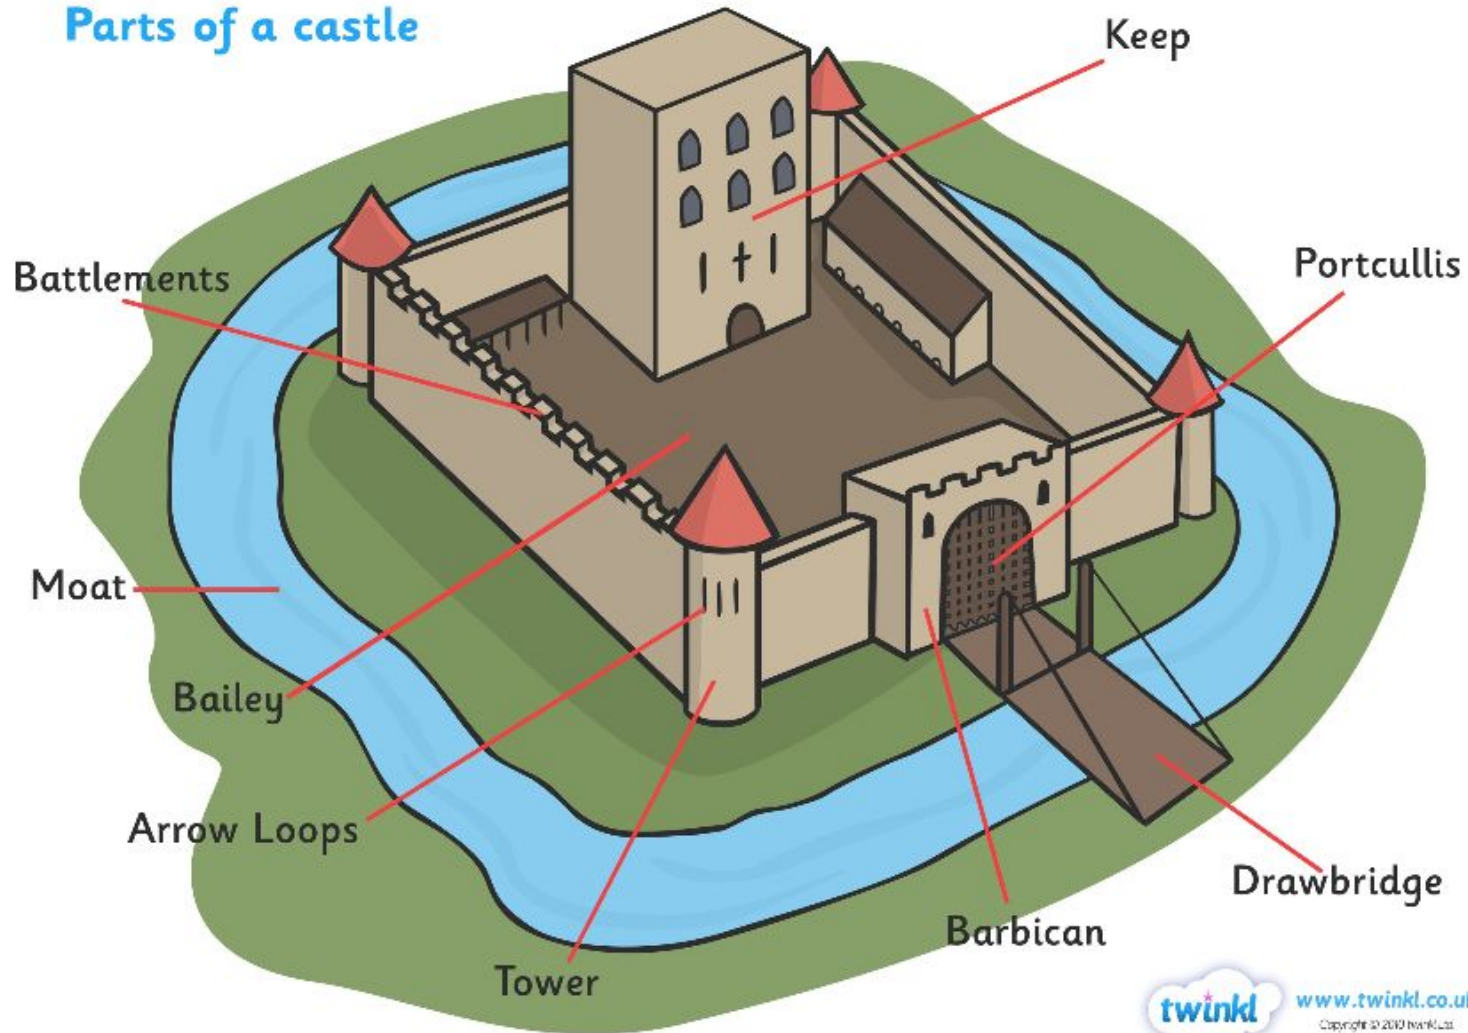

SECURITY IN DEPTH

Defense in Depth

Parts of a castle

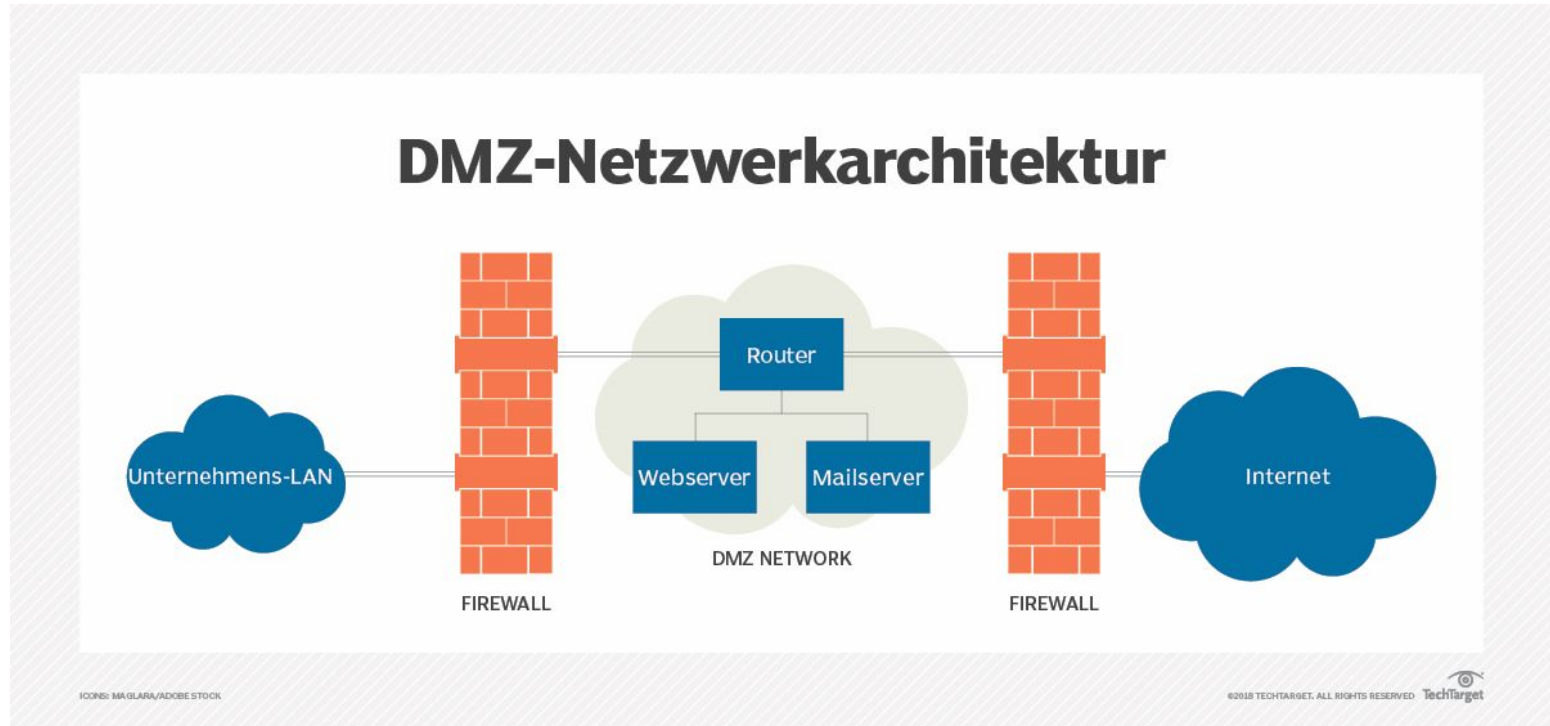

Defense in Depth - Perimeterschutz

Defense in Depth - Perimeterschutz

Perimeterschutz - Zoning/DMZ
